Experience

Product Architect, UIEvolution, Kirkland, WA - 2011-Current

Lead developer and project planner on new web projects. Develop sites and RESTful apis for large clients that were focused on mobile users. Help create a mobile strategy for businesses. Staff a growing web team. Get excited about HTML5-based solutions for customers. Work with: Ruby, JRuby, Java, MySQL, JavaScript, jQuery, jQuery Mobile.

Software Developer, UIEvolution, Kirkland, WA - 2010-2011

Developed mobile applications and web applications for clients including AT&T and Disney.

Junior Web Developer, MedWiz Technologies, Columbus, Ohio - 2010-2010

Worked on a tablet-focused web application for long-term health care facilities developed in Ruby on Rails. I fixed bugs and added new features using Ruby, Rails, jQuery, and CSS.

Project Manager, MyChowNow.com, Columbus, Ohio - 2010-2010

MyChowNow is a food delivery search engine based in Columbus that was developed with Ruby on Rails. I put the team together, assigned roles, managed meetings, and wrote code.

Software Development Intern, Fiserv, Dublin, Ohio - 2009

Introduced Continuous Integration to the Product Development department. Used Visual Studio, IIS 6.0, and SOAP testing to automate building and testing.

Project Coordinator, Fiserv, Dublin, Ohio - 2007-2009

Supported resource planning and tracking system. Wrote user documentation guides. Designed and maintained department website. Trained new employees.

Project Manager, Cybergolf, Mukilteo, Washington - 2006

Led projects from date of sale until date of completion. Filled content, wrote CSS, HTML, and elementary Javascript.

Education

The Ohio State University, Columbus - B.S. Computer Science, 2010

University of Washington, Seattle - B.A. Political Economy, 2006
